

**SAY HELLO TO
HARDSCAPE**

**THE LANDSCAPE YOU WON'T HAVE
TO GROW, MOW OR WATER.**

EWING
HARDSCAPE PRODUCTS

GROW YOUR BUSINESS WITH HARDSCAPE. WE CAN HELP. CREATE A NEW REVENUE STREAM WITH HARDSCAPE INSTALLATION OR MAINTENANCE.

Ewing offers the education, expertise and products needed to impress your clients and earn repeat business.

INSTALLATION MADE EASY

Simple and Creative Solutions that Yield High Profit Margins

With the majority of paved surfaces in the nation comprised of asphalt or concrete, the U.S. market is ripe for hardscape and landscape professionals to grow their business. Offer your clients another opportunity to perfect their landscape, and earn their repeat business by providing hardscape solutions.

Interlocking Pavers. Surfaces designed and installed with pavers are stronger, more aesthetically pleasing and less expensive over time compared to alternative paving techniques, such as asphalt or concrete. Create custom hardscape surfaces for any taste or budget using classic and vintage finishes, or capture the effect of natural stone.

GARDEN & RETAINING WALL BLOCKS

Add an element of interest to your clients' residential or commercial landscapes by incorporating simple, stylish garden walls, or help protect your clients' assets with large-scale, commercial-grade retaining walls.

SIMPLE MAINTENANCE SOLUTIONS

Hardscape Maintenance is a Business Development Opportunity

Serve as a solutions provider for your clients and take advantage of the add-on business associated with the selection and application of hardscape care products.

Sealants & Maintenance Solutions. Gratify your clients with simple solutions to their toughest hardscape maintenance challenges. Ewing offers a complete line of easy-to-apply natural and invisible surface protectors, color enhancement blends and stabilizing sealants for pavers and sand joints. Help keep your clients' surfaces looking like new with cleaners designed to combat efflorescence, dirt, grease, rust and paint.

ECO-FRIENDLY ALTERNATIVES

Green Solutions for Environmentally-Sensible Clients

Permeable Pavers. Offer your clients a simple, environmentally-friendly alternative to concrete or asphalt surfaces with permeable pavers. Create porous surfaces that are strong enough to withstand heavy vehicles, yet allow rainwater to filter naturally down into the underlying soil. Permeable pavers:

- Protect the quality of our water supplies by eliminating pollutant-laden runoff from entering natural waterways
- Recharge valuable groundwater aquifers
- Help prevent flooding
- Offer a visually artistic alternative to traditional solid surfaces

Rainwater Harvesting. Complement permeable paver surfaces with an underground rainwater harvesting system. Simple-to-install and perfect for residential and commercial applications, Aquascape's RainXchange™ system integrates easily into an existing landscape to capture and store water for reuse in the landscape.

NEW TRADE + NEW TOOLS = NEW REVENUE

Ewing Offers the Support You Need to Succeed in the Hardscape Business

Industry Support. To offer you the highest level of support, Ewing has partnered with the leading hardscape authorities such as the Interlocking Concrete Pavement Institute (ICPI), National Concrete Masonry Association (NCMA) and the Geosynthetic Materials Association (GMA).

Education. Enroll in one of Ewing's quality education programs or certification training offered in partnership with the ICPI, NCMA and GMA.

Certified Professionals. Ewing's team of friendly ICPI certified paver installers will assist you in selecting the right products for your next hardscape project.

Strong Vendor Partnerships. Gain access to the premier hardscape vendors, learn the options and intricacies of various product lines and meet your local manufacturer representatives.

For more information on hardscape products, installation or maintenance, contact your hardscape specialist at hardscape@ewing1.com.
