

Get Smart + Save Water

Water is our greatest resource. Help save water in your landscape with these smart ideas.

Smart Controllers

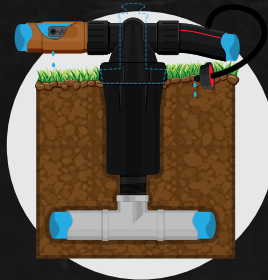

Smart controllers use weather and landscape data to automatically adjust watering schedules.

Up to **40%**
Potential Water Saving

Drip Irrigation

Great for all plants, including turf!

Convert sprinklers to drip with an adapter kit.

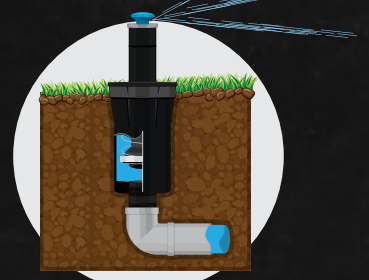

Use pressure compensating emitters with check valves and pressure regulators for maximum efficiency.

20-**50%**
Potential Water Saving

Efficient Sprinklers

Install and retrofit sprinklers with high-efficiency spray or rotor nozzles for more effective watering and water savings.

Use sprinklers with check valves in low spots and pressure-regulating sprinklers for ideal performance.

Up to **30%**
Potential Water Saving
